Omaha Unemployment Rate

3.6%

U.S. Unemployment Rate

Source: BLS

ECONOMY OVERVIEW:

Omaha continues to see steady job growth into 2021. At the close of the first quarter, 7,500 jobs had been created year-over-year (YOY). During the same timespan local unemployment declined by 80 basis points (bps), resting at 2.6% in the first quarter. Though job creation and employment gains have slowed down, growth is steady. According to the Department of Economics at UNO, nonfarm employment growth is projected to average 1.1% per year between 2022 and 2025. Many people that left the workforce amid the pandemic have started returning. However, employers are still struggling to fill job openings. Due to tight labor conditions, employers are offering more competitive wages. As a result, Omaha's median household income increased by \$1,400 YOY, and currently averages \$70,800 per household.

SUPPLY AND DEMAND:

Omaha's industrial market kicked 2022 off on a high note, recording its fourth consecutive quarter of positive absorption. Just over 230,000 square feet (sf) of positive absorption was recorded in the first quarter of 2022 and more than 3.8 million square feet (msf) has been absorbed since the first quarter of 2021. FedEx was the largest single occupier for the quarter, moving into its new 320,000 sf building in the Sarpy West submarket. Overall vacancy decreased by 270 bps YOY, ending the first quarter of 2022 at 3.7%. Seven new buildings were delivered, increasing the industrial inventory by nearly 813,000 sf. All but 141,000 sf of the new construction was claimed before completion. Another 5.3 msf of industrial product is currently in the pipeline and 86.0% of the space has already been spoken for. More than 4.5 msf of the new space is slated for delivery before year-end. Nearly all of these these properties were build-to-suit or have already been pre-leased. Consequently, we will likely see a large amount of positive absorption recorded throughout the remainder of the year. There has been approximately 3.8 msf of space demand since the beginning of the year.

PRICING:

Industrial asking rents continue to increase, averaging \$6.54 per square foot (psf) at the end of the first quarter. Following the outbreak of COVID-19, e-commerce sales skyrocketed, while bricks-and-mortar sales declined. Retailers began to pivot their business models and expand their e-commerce presence. Demand for industrial space skyrocketed quickly and rent increases
