Notes:

Renewals not included in leasing statistics

*Yields are calculated on a net basis as $Net\ Yield = NOI\ (1) / PP\ (2)$

1. Net Operating Income - after deducting all non-recoverable expenditure

2. Purchasing Price – excluding transfer costs, tax and legal fees.

With respect to the yield data provided, in light of the changing nature of the market and the costs implicit in any transaction, such as financing, these are very much a guide only to indicate the approximate trend and direction of prime initial yield levels and should not be used as a comparable for any particular property or transaction without regard to the specifics of the property.

Yields may be based either on estimations or market sentiment, depending on the number of transactions occurred in the selected submarkets.
