### ECONOMY

Jacksonville's population has grown by 45,300 residents since 2020, climbing by 1.2% in the past year alone. Nonfarm employment also expanded even further, with 16,500 new jobs added over the past 12 months, reflecting a 2.1% year-over-year (YOY) increase. Median household income rose 3.9% YOY, reaching \$87,500 in Q3. At 3.3%, the unemployment rate remained well below the national average of 4.1%.

### SUPPLY & DEMAND

Seven buildings delivered in Q3 totaling 1,900 units, bringing the year-to-date (YTD) total to 6,552 units across 24 properties. This represented a 10.1% increase in construction completions compared to the same period last year. However, the pace of new development slowed significantly, with a 47.1% YOY decline in units under construction. Although developers scaled back, 24 buildings totaling 6,108 units remained under construction at the end of the quarter.

Jacksonville recorded significant absorption gains of 2,062 units in Q3, bringing the 2024 YTD total to 5,944 units. Following a year of record-breaking delivery levels in 2023, this positive absorption is indicative of healthy demand. Despite the positive absorption, the market's stabilized occupancy rate—which excludes buildings in their initial lease-up phase or within 18 months of delivery—decreased slightly by 40 bps quarter-over-quarter to 90.8%.

### PRICING

Effective rents remained fairly stable, falling a modest 2.5% YOY to \$1,510 per unit. Renter demand has strengthened in 2024, and robust leasing performance is expected to give landlords the leverage to begin raising rents later this year.
